

COMMERCIAL PROJECT [INTERIOR DESIGN]**TITLE: TEA CAFE, VICTORIA, LONDON**

Chamama Tea Cafe concept in Victoria, London has just opened and was designed by Taylor & Co. Architects for an established London based Catering Company.

We used Italian counter fittings mixed with unique designed furniture and fittings to create an alternative tea café. The design brief came out of a London based catering company looking for a new tea based café concept, who appointed Taylor & Co. Architects to investigate the market and develop and initiate a concept on a new site in Victoria. From the design development

over the summer of 2008 came the building of the project, using several Italian companies and Shopfitters. This £200,000 fit out including designing many 3 Dimensional visuals and details prior to works starting.

Chamama tea café opened late October 2008 and it is envisaged the concept will, after trials, be expanded all over London within 2 years.
